CRIMSON GLORY. 1606C. Well formed flowers of an intense deep vivid crimson shaded oxblood-red mellowed by a soft velvety nap. Very prolific.

THE DOCTOR. 1626C. The buds are long and pointed, opening to enormous blooms of rich pink. Fragrance is excellent. Handsome, clean foliage.

BETTER TIMES. 1604C. The modern "American Beauty". Notable for its bright cerise-red color, pointed buds and long stems.

CONDESA DE SASTAGO. 1608C. Beautiful bi-color of copper-red and rich yellow. Large, fragrant blooms, produced in great abundance.

MCGREDY's SUNSET. 1612C. A gorgeously colored Rose; orange-yellow overlaid with warm salmon-flame, delicately tinted orange and rich scarlet.

EDITOR McFARLAND. 1610C. Richly fragrant flowers of clear, brilliant pink. Perfect in form and remarkably long lasting; excellent cut flower.

POINSETTIA. 1614C. A true poinsettia-red of velvety texture and non-fading color. Blooms abundantly and continuously.

ECLIPSE. 1608C. Slim tapering buds open into brilliant golden-yellow 4-inch blooms.

ROUGE MALLERIN. 1618C. Gorgeous double blooms of brilliant red; long pointed buds. Penetrating damask fragrance.

K. A. VICTORIA. 1616C. Lovely snow-white buds open to magnificent high-centered, fully double flowers of pure ivory-white.

ALTHEA

(Rose of Sharon) A tall growing shrub valued for the gay color it brings to the garden in late summer through fall, when other shrubs have finished blooming. Bears a profusion of large, single rosette flowers, which make a bright contrast against the dark green foliage. Grows 6 to 8 feet tall; popular for tall background in border, screens and specimens. **Your choice of colors: 1309C, Purple; 1311C, Red; 1307C, Pink**

PUSSY WILLOW

1422C. This is the large, French Pussy Willow which bears those enchanting fuzzy grey catkins with a pinkish cast. A welcome sight in early spring and so useful for combining with other spring blooms in bouquets. Hardy, tall growing shrub with attractive green foliage.

HYDRANGEA P. G.

1372C. Showy, pinkish-white blossoms form large panicles 6 to 10 inches long and almost as wide. Blooms deepen to a rose shade in the fall and dry right on the bush. Grows 5 to 6 feet tall. The blooms are fine for cutting, lasting a long time. Blooms during August and September. Hardy anywhere; easy to grow.

RED BARK DOGWOOD

1454C. One of the most popular of flowering shrubs. Masses of tiny white florets grouped into large, flat clusters of flower heads appear in spring, followed in late summer and fall by clusters of blue-black berries. Bright, glossy red-barked twigs are especially showy throughout the winter. Glossy green foliage turns crimson in the fall. Grows 6 to 8 feet tall.

SCARLET FLOWERING QUINCE

1396C. Loads of bright scarlet-red flowers with golden stamens are charmingly arranged along the stems in early spring. Foliage is green tinged maroon and very interesting. A medium height shrub, 3 to 5 feet tall; also makes a hardy, dense hedge. Small fragrant Quinces, rich in pectin, make delicious jelly.

ZABELI RED HONEYSUCKLE

1424C. The beautiful and brilliantly colored red Honeysuckle, — the reddest flowers of any bush Honeysuckle! Blooms profusely in May, followed by an abundance of bright red berries. A tall growing, compact shrub; excellent for back ground of border or screening purposes. Grows 7 feet tall; very hardy.

HYDRANGEA A. G.

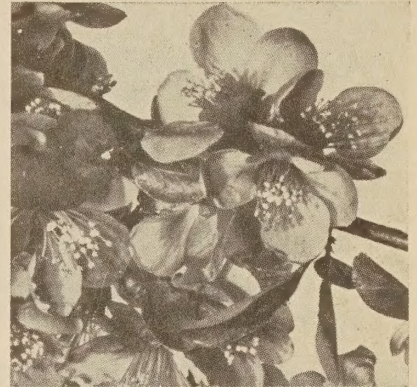

1370C. Produces large panicles of pure white flowers in great abundance from midsummer through fall. Bushes grow 4 to 5 feet tall and are very hardy. Will thrive in sun or shade. Large, bright green leaves are attractive from spring until frost. An ideal shrub for shady areas in foundation planting or shrub border.

WHITE SNOWBERRY

1404C. Large clusters of attractive waxy white berries remain on the branches most of the winter. Produces lovely pinkish-white flowers in late spring. Attractive, lustrous green foliage. Grows 3 to 4 feet tall; does exceptionally well in shade. A very showy shrub, that has many uses in foundation planting.

FORSYTHIA — Spring Glory

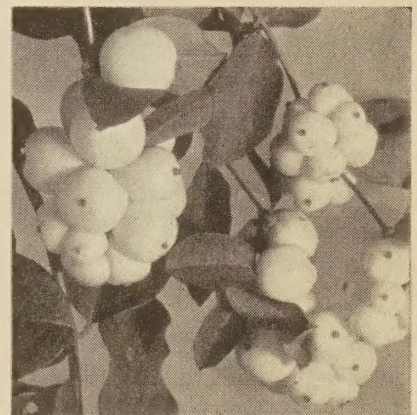

1360C. A spectacular new Forsythia that bears large, light yellow flowers which completely cover the branches in early spring, before the leaves appear. Has glossy green foliage. Hardy in all sections; thrives in all soils. Canes grow erect with gracefully drooping tips. Grows 5 to 6 feet tall; for border or specimen.

Broad-Leaf EVERGREENS

WILL BEAUTIFY YOUR YARD THE YEAR AROUND!

Ilex Convexa Hetzi

Ilex Rotundifolia

RHODODENDRONS

1397C. These hybrid varieties will provide a luxurious appearance when matured. Foliage is large, rich, glossy green and stays that way the year around. We cannot guarantee color of bloom, since these are hybrids, but shadings run from pink through the lavender shades to deep rose. They will thrive in full sun or shade. They are easy to grow, but do require an acid soil. Perfectly adaptable for use in most sections of the country for landscape work and foundation plantings.

Hollies

ILEX CONVEXA HETZI

1431C. One of the choicest of broad-leaf evergreens. Shiny dark green Boxwood-like foliage is somewhat convex, and so profuse the twigs are invisible. Plant is very bushy; grows about 4 feet high and 3 feet across. It blends beautifully with other evergreens, also excellent as an accent plant. Well suited for low hedges in cold climates where Boxwood will not grow. Plant 18 in. apart. **6-8 in. plants, 75c each; 2 for \$1.40; 5 for \$3.25; 10 for \$6.25, postpaid.**

ILEX ROTUNDIFOLIA

1430C. A handsome member of the Holly family, widely used for low hedges and foundation planting. Small, rounded, glossy leaves are similar to Convexa. Plant is evergreen and entirely hardy. Very attractive in all seasons, but especially so at Christmas when the berries are highly colored and at their best. **6-8 in. plants, 75c each; 2 for \$1.40; 5 for \$3.25; 10 for \$6.25, postpaid.**

American Holly

AMERICAN HOLLY (*Ilex Opaca*)

At Special Bargain Prices

1365C. By far the most famous of the Holly family. This Broadleaf Evergreen has glossy green leaves edged with spines and barbs, and clusters of bright red berries, so familiar to all of us as CHRISTMAS HOLLY. Can be easily grown in most all sections of the country, if planted where it will have some protection from harsh winter winds. Will thrive in a natural shelter, such as leeward side of larger spruce or hemlock plantings, shrub border or protected side of the house. Well suited to group plantings, hedges, or as individual specimens. We are proud to offer these 8 to 10 in. seedlings at popular low prices; extremely nice quality plants that will enable you to start a Holly planting or hedge at little cost. Plant in sheltered location and enriched soil kept acid with leaf mold or acid peat moss, for successful growth. **8-10 in. plants, 95c each; 2 for \$1.80; 5 for \$4.25; 10 for \$7.95, postpaid.**

EUONYMUS RADICANS

1440C. An upright, broad spreading shrub with rich bright green foliage that remains on the plant year round. Makes a shapely bush 4 to 5 feet tall. Its growth habit and easy culture make this an outstanding shrub for individual specimen planting. A plant that will blend well with your established evergreen plantings. The rigid branches are a perfect sight when carrying the red berries which hang on late in the season. Thrives in sun or partial shade. Be sure to plant one or more in your garden for a brilliant autumn display. **Heavy 12-15 in. plants, \$1.75 each; 2 for \$3.40; 4 for \$6.65, postpaid.**

BOXWOOD

1442C. Welleri. The hardiest of all Boxwood. Whether in small home grounds or large estate, Boxwood gives an appearance of age and dignity to its surroundings. Welleri has large dark green leaves and is fast growing. It makes a dense hedge quickly; can be trimmed to any desired height and shape. Will thrive anywhere; in poor soils, in sun or shade, under tall trees and in sunless corners. Perfect for low hedges and edging. We cannot recommend this grand plant to you too highly.

BABY EVERGREENS

IDEAL FOR WINDBREAK, SOIL
EROSION & CHRISTMAS TREES

AT MONEY-SAVING PRICES

Plant These
Sturdy
Well-Rooted
Transplanted
Evergreens

Grow them in your garden for 2 or 3 years before transplanting to permanent landscape location. In a few years they will be worth many times what you paid for them. Use them to control soil erosion. Protect your topsoil. It is vital to continuous plant growth.

PYRAMIDAL ARBOR-VITAE. 1040C. Narrow, shapely, pyramidal form with green, fanlike foliage. Stands full sun.

GLOBE ARBOR-VITAE. 1030C. Globular evergreen. Broad fan shaped leaves.

PFITZER JUNIPER. 1012C. The favorite in low growing spreading evergreens. Feathery green foliage is very attractive.

FASTIGIATA JUNIPER. 1010C. Tall, slender evergreen with silvery green foliage. A hardy and vigorous grower.

MUGHO PINE. 1050C. Dwarf pin-cushion pine with tufts of dark green pine needles.

SPREADING YEW. 1044C. Branches out from the bottom into a low-bush formation. Fine, glossy dark green foliage. Mature plants bear bright red yew berries.

UPRIGHT YEW. 1046C. The pyramidal type. Excellent for shade. Rich glossy green foliage remains attractive throughout the year.

HICKSI YEW. 1042C. Beautiful shrub-like evergreen of medium height, columnar in form, dense green foliage. Red berries in fall and winter.

SCOTCH PINE

1052C. A decorative tree densely covered with blue-green needles of medium length. Pyramid form gives it great character. Rapid growing; very hardy. Used for windbreaks, screens, etc.

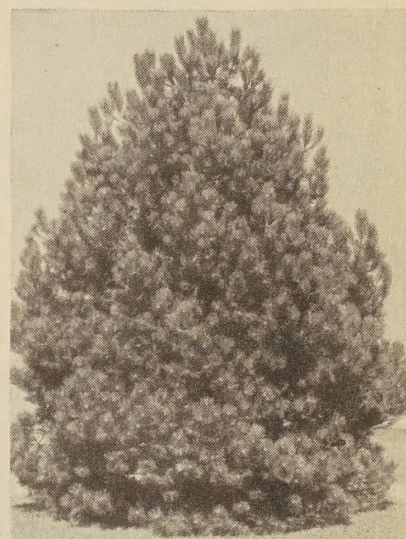

NORWAY SPRUCE

1022C. Fast growing, tall, stately. Dark green, thick, short needles. Extensively planted for outdoor Christmas trees. Recommended for street and specimen planting; windbreaks, hedges.

COLORADO BLUE SPRUCE

1020C. One of the most beautiful and highly prized of all evergreens. Silvery blue-green foliage. Tall growing compact and perfectly shaped. Makes a fine specimen tree, but should be used with discretion in foundation planting. It also provides good contrast among other evergreens. Grows slowly, but well worth waiting for.

Cut Leaf Weeping Birch

Wisteria Tree

Wisconsin Weeping Willow

Sycamore

Emlong's **STRAWBERRIES**
ALL STURDY WELL-ROOTED PLANTS

20th CENTURY

Flavorful Everbearing Strawberry

215C. We consider this variety an outstanding everbearer, second only to Brilliant. It is superior to other everbearers in size, quality and vigor of plant. It makes a vigorous growth with exceptionally heavy producing ability. The fruit is uniformly large and has a rich red coloring all the way through. It is very firm, making it an excellent berry for shipping long distances — and one of the best for freezing. The flavor is real honey-sweet;

delicious for eating fresh and for jams and jellies. The firm quality and attractive appearance of the berry is retained even when shipped long distances, and consequently, commands top market prices. The plant is exceptionally hardy and adaptable to all types of soil.

PREMIER

265C. The best selling strawberry from coast to coast. It is one of the earliest berries to bear, yet resisting late spring frosts, thus bringing "first-of-the-season" high prices. Plants are thrifty, vigorous growers and make a good fruiting row. It starts to ripen early and continues bearing heavily for a long period. Berries are uniformly shaped, long, pointed in shape and bright scarlet-red, having a super-delicious sweet flavor. Withstands dry weather and matures full size crops under adverse conditions. Excellent shipping qualities.

DUNLAP

245C. Dependable midseason to late Strawberry which stands coldest and warmest climates and poorest soils. Plants are medium in size, long rooted, extremely vigorous, free from disease, and will make more plants than any other variety grown in the midwest. Berries are medium size, very dark red, and honey-sweet. Highly favored for preserving, jam, etc. Very productive.

EMPIRE

254C. Introduced by the New York Experiment Station at Geneva, this new variety is proving a good money-maker for commercial growers. The berries are large, bright red and so attractive they command highest prices. The plant is thrifty vigorous growing; makes a good fruiting row. The berries are extra delicious; have good shipping and keeping quality. Ripens a few days ahead of Premier.

GEM (Everbearing)

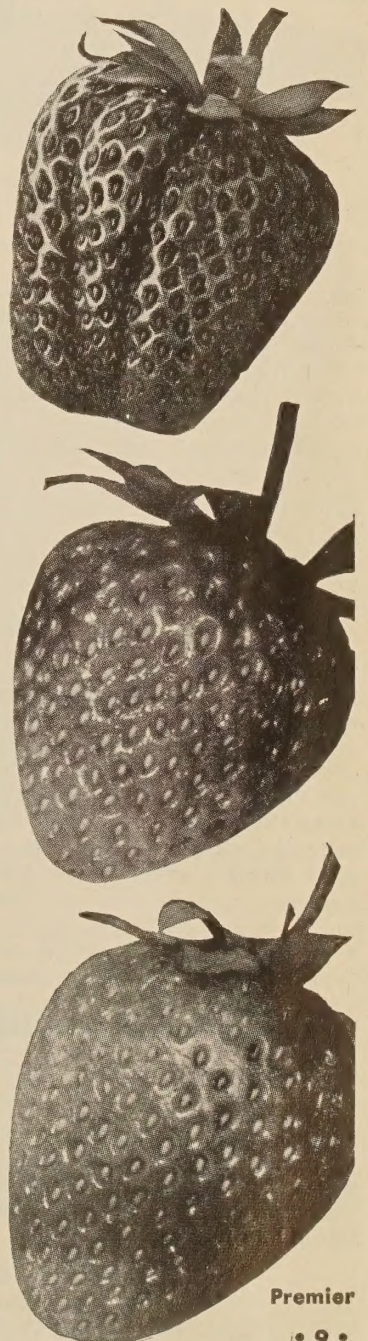

220C. Gem has proven itself to be one of the good, dependable older varieties of Everbearers. Developed here in the mid-west, it has proven itself in most all sections of the country. It is an excellent plant maker, and produces a heavy crop of excellent quality berries. Fruit is large, bright red in color and highly recommended for home garden use. Plant our heavy fruiting strain of Gem for a dependable everbearer.

ROBINSON

270C. One of the best mid-season to late berries — ripens 10 days to two weeks after Premier. Robinson is one of the largest berries grown, often 30 berries will fill a quart box. Fruit is extra-large, bright shiny red, conical in shape and well colored to the very center. Flavor is honey-sweet. A vigorous, healthy grower and very productive. It bears heavily over a long period. A favorite with commercial growers and a wonderful berry for canning and freezing purposes.

CATSKILL

240C. Catskill is excellent for freezing. One of the best mid-season to late varieties. Catskill is a cross between Premier and Marshall. It is a sure cropper as it ranks next to Premier in this respect. It rarely ever freezes out. Fruit is bright, shiny red. Plants make a fine, vigorous growth. Fruit is produced on long, thick stems making it easy to pick. An excellent berry for shipping and home use. Very hardy.

EMLONG NURSERIES ANNUAL PLANTING TIME SALE

Scott Emlong
age 7 years
and Dwarf
Apple Tree

FULL SIZE FRUIT ON
**Dwarf
FRUIT TREES**

DWARF APPLE TREES

Emlong's Dwarf Apple Trees are ideal for the grower with limited space. These small trees grow to a height of 8 to 12 feet. Although the trees are dwarf, they bear the same full size, delicious fruit as the standard trees. They are young-bearing; usually start to bear the second year after planting. Enjoy this easy-to-pick fruit in your own yard. By planting several trees of different ripening dates, you can have a succession of delicious, sun-ripe fruit all season.

Important: Plant with bud union 2 to 3 inches above surface of the ground.

VARIETIES:

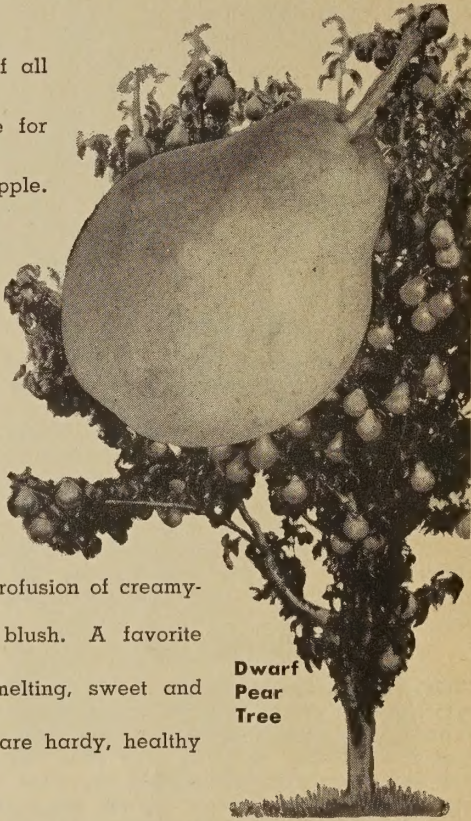

Solid RED DELICIOUS. 614C. Truly King of all red winter apples.

Bright RED JONATHAN. 616C. A favorite for both cooking and eating; crisp and juicy.

RED McINTOSH. 620C. The best red fall apple. Juicy, fine for sauce and eating fresh.

PRICES:

	Each	2	4
4-5 ft.	\$4.25	\$8.25	\$16.25
3-4 ft.	3.25	6.25	12.25
2-3 ft.	2.75	5.25	10.25

Dwarf
Pear
Tree

DWARF PEAR TREES

Bear full-sized, delicious fruit, the same as standard varieties. A boon to home gardeners and growers with limited space. The trees seldom grow more than 6 to 10 feet tall, yet bear an abundant crop every year. They are very ornamental in spring with their great profusion of creamy-white, fragrant blossoms. Plant as close as 5 feet apart. Very hardy; thrifty.

DWARF BARTLETT. 604C. Fruit is large, juicy, highly flavored; yellow with a beautiful blush. A favorite summer Pear.

DWARF CLAPP'S FAVORITE. 606C. Golden yellow fruit with red cheek. Fine texture, melting, sweet and juicy. Ripens in August.

DWARF DUCHESS. 608C. A greenish-yellow, spotted russet Pear, with rich flavor. Trees are hardy, healthy and bear large crops.

PRICES:

	Each	2	4
3 to 4 ft.....	\$2.95	\$5.75	\$11.25
2 to 3 ft.....	2.25	4.25	7.95
1½ to 2 ft.....	1.69	2.98	5.49

DWARF PEACH TREES

You won't need a ladder to pick the delicious, full size fruit from these Dwarf Peach trees. Grown on special root stock, these trees have an ultimate height of only six feet, yet produce the same abundant crop of large size fruit as standard peach trees. Even with limited backyard space, you can now enjoy a full season of luscious, sun-ripened fruit from your own trees.

RED HAVEN. 625C. Ripens extra-early. Firm, sweet, golden-yellow flesh.

FAIRHAVEN. 621C. Ripens a week before Halehaven. Ideal for freezing.

REDSKIN. 623C. New; beautiful and delicious! Ripens with Elberta.

HALE HAVEN. 624C. Perfect freestone; firm, juicy, excellent flavor.

PRICES:

DWARF OKA CHERRY

628C. This Hardy Hybrid Cherry Plum produces a full crop, even in coldest climates, where other varieties fail. Fruit is dark purplish-red all through; sweet and delicious, for eating fresh, and for preserves, jams and jellies. The tree is shapely and ornamental; produces showy blossoms in spring. Fruit ripens late July or early August.

DWARF SAPA PLUM

626C. Tree is rapid growing; young-bearing. Fruit is red-fleshed, medium size; deliciously sweet and juicy. Small freestone; good for canning and pies. Hardy in all sections. Enormous cropper even in coldest climates. Trees are especially beautiful in early spring when loaded with shimmering white blossoms. Plant two trees for best results.

HARDY NORTHERN GROWN
FRUIT TREES

We have a limited supply of smaller sizes in the popular varieties of hardy fruit trees, and are offering them at special sale prices.

HEAVY PRODUCING APPLE TREES

CORTLAND. 3004C. A McIntosh type apple, quick to bear and heavy yielding. Fruit is large, uniform in shape and size, rich red in color. Sub-acid.

RED DELICIOUS. 3006C. King of the winter eating apples. A very fine double red strain. Ripens in October and is an excellent commercial variety.

RED MC INTOSH. 3012C. Our own large fruiting strain of McIntosh is highly prized for its flavor and quality. Red apples; white flesh. Very juicy and highly aromatic. Heavy yielding. Ripens early fall.

RED JONATHAN. 3008C. Popular with commercial growers. Excellent flavor. Desirable for eating and cooking. Flesh crisp, and juicy.

RED ROME BEAUTY. 3014C. An all-red strain of the old Rome Beauty. Prized for baking. Keep well all winter.

YELLOW DELICIOUS. 3016C. Queen of late fall Apples. Flesh is firm, crisp, juicy and delicious. Finest yellow Apple.

TURLEY WINESAP. 3018C. All-red winter Apple. Large, crisp, juicy fruit; excellent for eating fresh, cooking and drying.

Special Sale Prices	Each	2	5	10	25

HARDY PLUM TREES

STANLEY PRUNE. 3402C. Sweetest Prune grown and bears the quickest. Freestone, ripens midseason, hardy and an excellent commercial variety. Yields heavily every year. Hardy and thrifty grower — self-pollenizer.

SUPERIOR. 3406C. Semi-Dwarf tree that bears at an early age. Wine-red skin covered with purple bloom. Yellow flesh, sweet, juicy and freestone. Very hardy in all sections. Very productive.

EUREKA. 3404C. The delicious flavor is a combination of Plum, Apricot and Peach. Known as the "Red Nectar" fruit because juice is red and sweet. Excellent for dessert and canning. Freestone.

NORTHERN GROWN PEACH TREES

RED HAVEN. 3314C. An extra early ripening, flaming scarlet peach. Firm fleshed, fine, sweet, golden yellow. Freestone.

HALEHAVEN. 3306C. Second only to Elberta in popularity and profit. Large, with deep orange skin and red blush. Colors long before ripe. Firm, juicy.

FAIRHAVEN. 3304C. Ripens a week before Halehaven. The perfect Haven type peach ideal for freezing. Bright golden color with red cheek.

ELBERTA. 3302C. The original strain. Still the world's standard by which all other peaches are judged. Need we say more?

KALHAVEN. 3316C. A perfect yellow freestone; same size and shape as Halehaven. Has a distinct rich juicy flavor of its own. Wonderful for shipping.

RIO OSO GEM. 3318C. Ripens a few days after Elberta. The fruit is large, round and highly colored. Flesh deep golden yellow, fine, firm and perfectly freestone. Profitable for commercial and home orchardists.

HARDY PEAR TREES

BARTLETT. 3202C. The favorite, both commercially and for home use. Large, waxen yellow with red blush. Ripens in September.

CLAPP'S FAVORITE. 3204C. Large fine textured pear resembling Bartlett. Ripens early. Pale yellow with red cheek, rich and juicy. Hardy and productive, especially where others fail.

BOSC. 3206C. Firm skin makes it a wonderful keeper unequalled as a dessert pear with its very firm, sweet white flesh.

SECKEL. 3208C. (Sugar Pear). Small size, yellow russet with bright red cheek. Flesh white, very juicy, buttery and excellent flavor. Vigorous grower and produces enormous crops each year.

Black Hawk

BLACK RASPBERRY

Large Delicious Berries

701C. An outstanding new Black Raspberry, originated by the Iowa State College Experiment Station and introduced in 1955. *Black Hawk* outyields all other varieties — achieving a production record of 5,000 pints per acre. The extra large berries often measure $\frac{3}{4}$ -inch in diameter! The fruit is sweet, juicy and has a rich, delicious flavor. Ripens midseason, about the first week in July. The berries have a glossy black color and firm quality; stand up well in shipping. Excellent for eating fresh, canning, freezing, preserves and jams. Plants are strong, healthy and vigorous. Commercial growers and home gardeners too, will find *Black Hawk* one of the most profitable Black Raspberries to grow.

EMLONG NURSERIES ANNUAL PLANTING TIME SALE

Our annual **Spring Bargain Flyer** is a supplement to our big 1958 spring catalog. We have listed many bargains for you, consisting of top-quality nursery stock.

ORDER AT ONCE AND AVOID THE LATE RUSH

WE RETURN ALL PAPERS

All papers pertaining to your order will be returned to you when the order is acknowledged. Do not destroy them. If it becomes necessary to write us at any time in regard to your order, be sure to return everything, including correspondence, original order and shipping tags. It is not necessary to return planting instructions.

References: We refer you to the Farmers & Merchants National Bank, Benton Harbor, Michigan; Postmaster and Express Agent at Stevensville, Michigan; Merchants Credit Bureau, Benton Harbor, Michigan, and Dun and Bradstreet.

Prices in this catalog are Net. No further discounts or premiums allowed.

OUR GUARANTEE

(1) — Emlong's guarantee everything to reach you in finest growing condition. If found to be otherwise, make damage claim within 3 days after receipt of stock and we will replace damaged items free.

(2) — Emlong's guarantee all stock to grow and live. If anything fails, report such loss to us within 60 days, or not later than July 1st. We replace during the next planting season. Half price replacements from July 1 to September 1. The nursery is not responsible for losses caused by unfavorable weather or improper planting care.

(3) — Emlong's guarantee everything to be true to name. If found to be otherwise, we will replace free upon due proof of untruthness.

PASSION FLOWER

**Exotic, Supremely Beautiful
Tells Story of The Crucifixion**

2088C. (*Passiflora Caerulea*). Magnificent 4-inch flowers, pink with crown of purple and white. The unusual structure of the flowers was thought, by early discoverers, to be emblematic of the Crucifixion. According to legend, the stamens represent 5 wounds; 3 pistals, the nails; filaments, the crown of thorns; petals, the apostles; tendrils, the scourge.

The plant is a vigorous growing, tendriling climbing vine. Blooms from early summer to late fall. Grows 10 to 20 feet tall. Not hardy in northern sections; can be potted for indoor culture over winter. **75c each; 3 for \$2.25; 6 for \$4.25, postpaid.**

ALMEY FLOWERING CRAB

**Order
Today!**

1256C. The most spectacular of all Flowering Crab trees. In spring its brilliant, fiery-crimson color is truly breathtaking — a single lawn specimen will enliven the whole neighborhood!

Almey Crab is perfectly hardy in all sections and attains its mature height of 12 to 15 feet quite rapidly. Does well in full sun or partial shade and will thrive even in poor soil.

Lovely 2-inch blooms of a glistening fiery-crimson load the branches in early spring. Each petal has at its base pure white markings that give the blossom the appearance of a five-pointed star. In fall the tree bears an abundance of small scarlet fruits which cling to the branches long after the leaves have dropped — providing another high spot of color long into winter.

Plant Almey Crab this spring. A single lawn specimen or a grouping, will add rich color accents to your home grounds.
